### Workshop in the clean room

The Institute for Large Area Microelectronics will offer a two-day hands-on workshop in its clean room starting on Monday in the week of the conference.

Participants will build their own seven-segment digital clock display (TN-LCD). This unique workshop incorporates

- ITO sputtering
- Photo lithography
- Plasma treatment
- Orientation layer preparation
- Cell assembly
- Vacuum filling

Afterwards a simple addressing circuit is attached to the fabricated displays. Each participant can keep his/her self-made desktop clock. The workshop will take place at the Institute for Large Area Microelectronics located at Allmandring 3b in Stuttgart-Vaihingen.

As there are only a few places, "first come, first served" applies.

## Eurodisplay 2022

Scientific Conference

September 21-23, 2022

### Scientific conference on information displays and related topics

The Eurodisplay is Europe's most important scientific conference on information displays and related topics attracting scientists and engineers from all over the world. Eurodisplay 2022 will take place at the University of Stuttgart in Germany. The scientific sessions will be held at the University campus in Stuttgart-Vaihingen.

A broad variety of presentations will be offered as well as special topics, such as:

- Active Matrix Technologies
- Flexible Displays
- Process Technologies for Large Area Microelectronics

Companies have the opportunity to showcase their technologies in tabletop presentations. In case of interest please contact:
